EDUCATION

B.Sc. Computer Science

Co-operative University of Kenya
2024 — Present (Expected 2028)

CERTIFICATIONS

Cisco Networking (In Progress)

Cisco Ethical Hacking (In Progress)

* Currently pursuing both tracks

TECHNICAL SKILLS

HTML / CSS

Python

FastAPI

C / C++

Docker

Linux

AWS

WebSockets

scikit-learn

NLP

CI/CD

React/Next

LANGUAGES

English — Fluent

Swahili — Native

INTERESTS

- Ice Hockey (Team Captain, CUK)
- Cybersecurity Research
- AI & Machine Learning
- Open Source Development

PROFILE

Passionate 2nd-year Computer Science student and self-driven developer specializing in backend engineering, AI/ML systems, and DevOps. Built and deployed production-grade systems including an AI-powered cyber defense platform (Cerberus) at the NIRU Hackathon, Nairobi. Experienced in cloud deployments, ML model training, and full-stack architecture. Team captain and competitive hockey player.

EXPERIENCE & PROJECTS

Backend Engineer & ML Lead — Cerberus Defense Suite

NIRU Hackathon, Nairobi | 2025 | Team Project → cerberus-defense-suite.onrender.com/docs

- Built full FastAPI backend with JWT auth, WebSocket real-time alerts, and Fernet AES-256 encryption.
- Trained Isolation Forest, Random Forest & LinearSVC ML models for keystroke biometrics and email threat detection.
- Deployed live on Render; managed SQLite DB, Docker containers, and CI/CD pipeline.
- Implemented 3-headed architecture: Decoy Engine, Credential Sentinel, BEC Assassin.

Head of DevOps & Infrastructure — e-Masomo Revamp

Chipukizi Hive | 2025

- Led AWS deployments, Docker environments, and CI/CD pipelines for a Moodle-based university LMS.
- Improved platform uptime, security posture, and file handling. Implemented Behat testing.

Freelance Developer — Lux Shop

2025 → github.com/Ramsey-Javan/lux-shop

- Built responsive jewelry and art shop website with product showcase and contact workflows.

School Management System — Ruebens-man-sys

Personal Project | 2025 → github.com/Ramsey-Javan/Ruebens-man-sys

- Web-based school operations system with MPESA payment integration, user auth, and DB optimization.
- Stack: Python, PostgreSQL, Docker, AWS.

Developers Mate — AI Developer Agent

Personal Project → github.com/Ramsey-Javan/Developers_Mate

- AI agent automating code generation, testing, and debugging with NLP and bug detection.
